PROFILE

*Full Stack Jr. Web Developer with a specialization in Backend, trained at the Soy Henry bootcamp after more than 800 hours of intensive practice in web development. I work with **JavaScript, TypeScript, Node.js, Express, Nest.js, PostgreSQL and React**, applying good practices in architecture and API design. I am interested in automation projects, **system integration and development of functional and scalable applications**, where I can continue to strengthen my knowledge in **AI and process automation**. My previous experience in management and entrepreneurship enhances my organization, **creativity, and collaborative work skills**. I am motivated to grow in dynamic environments where continuous learning and technical improvement are part of everyday life.*

FEATURED PROJECTS

Full Stack/ Frontend – Portfolio Web

11/2025 – 11/2025 | Academic Experience

Personal website designed to present projects, skills and professional experience within the IT area.

- I developed the complete interface with **React** and **Vite**, implementing reusable components and a responsive design optimized for different devices.
- I integrated animations, functional forms and sending messages through **EmailJS**, prioritizing a fluid and intuitive user experience.
- I achieved a modern and scalable platform that reflects my technical profile and effectively communicates my professional identity as a web developer.

Stack técnico: Vite · JavaScript · HTML · CSS · Tailwind CSS · EmailJS · GitHub Pages.

<https://portfolio-jvu.vercel.app/>

Backend – HR System

10/2025 – 10/2025 | Academic Experience

Web platform to optimize the management of human resources and internal processes of an organization.

- Implemented CRUD functionalities for employees, areas and users, along with a system of roles and secure authentication (Admin / Employee).
- I incorporated **Socket.io**, **Cron Jobs** and **SendGrid** to automate notifications and email sending.
- I managed to centralize personnel information and improve traceability and efficiency in internal communication.

Stack técnico: Nest.js · Node.js · TypeScript · Express · PostgreSQL · TypeORM · JWT · Clerk/Auth0 · Socket.io · SendGrid · Cron Jobs · Swagger

Full Stack – Turnero "Verte Única"

06/2025 – 06/2025 | Academic Experience

Web application for the management of shifts in establishments, with session authentication and user control.

- I developed the backend with **Node.js**, **Express**, **TypeORM** and **PostgreSQL**, implementing RESTful routes, validations with DTOs and handling secure sessions.
- I created the frontend with **React** and **Vite**, using **Context API** for global user and shift management, with protected routes and interactive validations.
- I achieved a functional and scalable system that optimizes appointment management, improves the user experience, and ensures traceability of shifts.

Stack técnico: Node.js · Express · TypeORM · PostgreSQL · React · Vite · Context API · crypto · express-session · Nodemailer.

PROFESSIONAL EXPERIENCE

Professional transition and intensive training in ITene. 2023 – Oct. 2025

- Professional **reconversion period** oriented to full stack web development.
- Technical and practical training in **frontend, backend, databases, version control and agile methodologies**.
- Development of individual and group projects applying good practices and modern development tools.

VOLUNTEERING

Full Stack Teaching Assistant – Henry Bootcamp

jun. 2025 – sept. 2025

- Accompaniment to groups of students in full stack programming internships.
- Assistance in solving exercises with **JavaScript, React, Node.js and Express**.
- Promotion of collaborative work **and Pair Programming**.
- Delivery monitoring and technical support in development environments.

TECHNOLOGIES:

- **Programming Languages:** JavaScript (ES6+), TypeScript.
- **Frameworks Tools:** Node.js, Express.js, Nest.js, React, Redux, Vite.
- **Database:** PostgreSQL, TypeORM, MongoDB.
- **Tools:** Git, GitHub, Trello, Jira, Confluence, Slack, Postman, Swagger, JWT (authentication), bcrypt/crypto (encryption), Nodemailer/SendGrid (emails), WebSocket/Socket.io, Stripe (payments), Cloudinary (image management).
- **Agile:** Scrum.

PROFESSIONAL EDUCATION

- **Full Stack Web Developer – Henry Bootcamp.** *February/2025 start – October/2025 end*

LANGUAGES

- English B2 - Intermediate.
- Intermediate Portuguese
